ROOTED IN LOVE.

Planting trees impacts many aspects of our lives and the environment. From improved air and water quality to positive health benefits, trees make our world a better place.

We work in partnership with leading forestry experts for all A Tree to Remember plantings.

A TREE *to* REMEMBER™

A tribute that will last for generations.

www.memorialtree.com

Sapling /ˈsæplɪŋ/ n. A young tree with a slender trunk is known as a sapling. Just as a young duck is called a “duckling,” a young tree is called a sapling.

When a sapling is planted in memory of someone you love, their legacy lives on long into the future.

This meaningful gift breathes new life into America's forests and delivers natural benefits year after year to our planet.

This tribute is a living memorial that will grow and flourish for generations to come.

Your memorial tree gift includes:

- Tree planting donation to areas most in need of reforestation
- Beautiful, digital tree dedication certificate
- Message and post to the online obituary announcing the contribution

As a participating funeral home, we plant a Tree in Memory to memorialize every loved one we serve.

Tree specialists plant memorial trees during optimal planning season in forests damaged by wildfire or other natural disasters.

A tree is a natural climate solution:

PROVIDES WATER

More than 50% of U.S. drinking water comes from forests.

CLEANS AIR

Trees have been dubbed the “lungs of the earth” because they absorb pollutants and filter contaminants in the air.

CREATES OXYGEN

One large tree can provide a day's supply of oxygen for up to four people.

“My mom always loved nature, and I always feel closer to her when I walk through a forest. Planting a tree in her memory made me feel like I was paying tribute to her while making the world a better place.”

-Craig David

Ask your funeral provider about how friends and family can plant a tree to remember.
